The charts, tables, and graphs contained in this document are not intended to help the reader decide which or when securities to buy or sell. The securities of a portfolio company may be affected by uncertainties such as government policies, taxation, restrictions on foreign investment, interest rate, other laws and regulations and currency fluctuations. This document may only be distributed to those eligible to invest in the fund.

VII. NET ASSET VALUATION AND ANNUAL ACCOUNTS

The Directors of the Fund in relation to the initial asset CLASS B agree to compute and provide the following reports to Investors, each in a form acceptable to the Directors and prepared in accordance with International Accounting Standards.

1. NET ASSET VALUE

The Net Asset Value per Share of the related asset class on each Valuation Day will be computed by the Fund Accountant and reported to the Investors within 15 business days of the Net Asset Value having been approved by the Board of Directors of the Fund

2. ANNUAL AUDITED FINANCIAL STATEMENTS

Annual audited financial statements will be provided, upon request, within three months of the financial year-end.

Whilst the Related asset class will endeavour to provide the aforementioned by the time deadlines stated, the Related asset class shall not be held liable for any delays in providing the relevant reports and/or publishing the relevant information which result from unexpected contingencies, such as delays in receiving necessary information from which to prepare such reports or information; equipment failure; fire or other physical damage to office or equipment or power failures.

The audited financial statements shall be kept at the registered office of the Board and filed with the FSC within 3 months of the financial statement period end, or any such other time as determined by the FSC.

VIII. SPECIFIC RISK FACTORS

In addition to the risk factors set forth in the private placement memorandum, the following additional specific risk factors exist in connection with the Related asset class 's investment policy to invest fixed-income vehicles.

Management Risk: The success of the Related asset class 's investments in fixed-income vehicles is subject to the ability of the Board of Directors to achieve the Portfolio Fund's investment objectives.

Inflation Risk: Inflation risk is the risk that the value of assets or income from fixed-income investments will be worth less in the future as inflation decreases the value of money. Inflation also tends to lead to higher interest rates which in turn cause bond prices to fall.

Non-Diversification Risk: If the Related asset class 's investment in fixed-income vehicles represents a relatively significant percentage of the Related asset class 's portfolio, the value of the portfolio will be more impacted by a loss on that vehicle than if the portfolio were more diversified.

Interest Rate Risk: Interest rate risk is the risk that the value of fixed-income vehicles will fall if interest rates increase. These securities typically fall in value when interest rates rise and rise in value when interest rates fall. Fixed income securities with longer periods before maturity are often more sensitive to interest rate changes. Hence when interest rates rise, fixed-income vehicles prices fall and conversely when interest rates fall, fixed-income vehicles prices rise. The longer the time to a bond maturity, the greater the interest rate risks.

Natural Disasters: The financial markets are often severely affected by natural disasters such as earthquakes, hurricanes and tsunamis. In the event of a natural disaster in a region of high economic output, financial markets normally sell-off, resulting in a severe decline in market value of all securities. Natural disaster therefore could be detrimental to the Net Asset Value of the Related asset class .

Economic Climate: The reporting of weak economic data such as unemployment figures, house buying, consumer confidence, gross domestic product, inflation etc. can have a direct or indirect impact on the value of a chosen stock.

Past Performance: Past performance is no indication of future performance, although investment decisions may contribute some weight to a stocks past performance when deciding to invest in the stock.

Taxation Risks: Taxation risk involves the taxation laws of the jurisdiction in which incorporation is domiciled. Local tax laws may impose withholding taxes or other taxes on the payment of dividends on a stock or the payment of interest on a fixed-income security.

Political Risk: The value of a specific stock may be affected by uncertainties such as political or diplomatic developments, social and religious instability, changes in government policies, taxation and interest rates, acts of god, war or acts of terror and other political and economic developments in law or regulations and, in particular, the risk of, and change in, legislation relating to the level of foreign ownership of a project.

Counterparty Risk: Any monies or assets held by counterparties on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

Default Risk: Default risk is the risk that the issuer of the fixed income vehicle defaults with any payment in relation to the fixed income vehicle issued. Lenders and Investors are exposed to default risk in virtually all forms of credit extensions. The global economy is currently experiencing a "sovereign debt crisis" whereby certain member

states of the European Union are on the verge of technically defaulting on their sovereign debt.

Emerging/Developing Country Risks: The relevant asset class may invest in certain emerging market countries which are more speculative in nature, are subject to greater market fluctuations and risk of loss than normally associated with investments in more developed and more politically and economically stable jurisdictions with more sophisticated capital markets and regulatory regimes, such as the United States and Western Europe.

Currency Exchange Risk: Investments may be made which are denominated in currencies other than the base currency of the Asset Class. Due to currency exchange, there is a risk that any gains in investment value will be off-set against a change in exchange rate.

The Foreign Account Tax Compliance Act (FATCA):FATCA is U.S legislation relating to combating tax evasion and the recouping of tax revenues. FATCA requires that non-U.S foreign financial institutions identify and disclose their U.S members or be subject to a 30.00% withholding tax on any U.S sourced income paid on or after the 1st January 2014. Further detail regarding the implementation of this legislation is pending; however, Investors should be aware that certain information on Investor required on subscription of shares to the Fund could be disclosed to U.S authorities.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE MEMORANDUM AND THE PRIVATE PLACEMENT MEMORANDUM AND CONSULT WITH THEIR PROFESSIONAL ADVISERS BEFORE DETERMINING WHETHER TO INVEST IN THE FUND AND ITS RELATED ASSET CLASS.
